

WINTER PATHS / SNOWSHOEING

JORASSE

PRACTICAL INFORMATION

Duration

One way 2h10
Return 1h35

Length 4 km

Height 560 m

Min. altitude 1'400 m

Max. altitude 1'940 m

Period December to April*

Mountain restaurant Jorasse

Parking of the chairlift

*depending on the opening time of the ski area and snow conditions

DESCRIPTION

The itinerary starts right after the departure of the chairlift, at the Cantonal Sports Centre, and climbs through the forest up to the mountain pasture of Odonne. As you climb, the view gradually unfolds. One steadily gains altitude, alternating between flat and sloping sections until reaching the Bougnonne mountain pasture, from which one can then rejoin Jorasse.

The Jorasse chairlift can be used both for descending and ascending.

The path intersects the Ovronnaz skiing area several times and runs along the ski slopes for about 800 metres. Be aware that skiers occasionally travel along stretches of the trail.

Depending on the snow conditions, it can take a few hours or several days to ensure that the trail is safe, and grooming cannot always be assured. The route may be closed because of the risk of avalanches.

You must check with ski lift personnel before venturing out.

SAFETY PRECAUTIONS

Winter hiking trails are marked in pink. They are regularly groomed and well maintained. Your safety on trails is your responsibility.

Conditions vary considerably depending on sun exposure and temperatures. The trails tends to freeze or harden depending on the weather: sturdy footwear and walking sticks are recommended! Crampons or snowshoes may be necessary. Risk of slipping.

Before starting out, check out snow conditions, weather and avalanche risks.
